EXPERIENCE

Angular Developer

April 2024 – Present

Stealth Code

Noida

- Developed dynamic UI components using Angular and TypeScript for a scalable Incident Management System.
- Integrated Chart.js and Leaflet.js to visualize real-time incident data through interactive charts and geospatial maps.
- Collaborated with backend teams to consume RESTful APIs and manage complex data flows using RxJS and observables.
- Used Azure DevOps for source control, CI/CD pipelines, and sprint planning, ensuring smooth and efficient development cycles.

Angular Developer

August 2022 – March 2024

Techmatys

Dehradun

- Developed and maintained responsive UI components using Angular, TypeScript, Bootstrap and HTML/CSS for a comprehensive School Management System.
- Integrated frontend components with backend APIs using RxJS, HTTPClient, and Observables for seamless data binding and real-time updates.
- Collaborated with the backend team to define and consume RESTful APIs, ensuring efficient data flow between frontend and backend services
- Optimized application performance by lazy loading modules, reducing bundle size and improving page load times.
- Used Git for version control and JIRA for task tracking and sprint planning.

PROJECTS

TaskFlow Pro | *Angular, TypeScript, Tailwind, Akita, Bootstrap*

- Developed a full-stack project management platform mimicking Jira's core features, task(issue) creation, project boards, and task assignment.
- Implemented dynamic, responsive user interfaces with Angular, leveraging its component-based architecture to build reusable UI elements for tasks, boards, and users.
- Utilized Akita for efficient state management, enabling seamless data handling, task synchronization, and real-time updates across various parts of the application.

Task Management App | *Angular, TypeScript, Firebase, Angular Material, Bootstrap*

- Developed a fully responsive Task Management Application using Angular and TypeScript, enabling users to create, update, and track tasks in real time.
- Implemented CRUD operations, task categorization, due dates, and real-time status updates.
- Designed a scalable project structure and applied component-based architecture for maintainability and reusability.

Blog Platform | *Angular, Node.js, Express, MongoDB, Tailwind Css*

- Developed a full-stack Blog Platform enabling users to create, edit, and delete blog posts with a rich-text editor interface.
- Designed and implemented RESTful APIs with Node.js and Express for secure CRUD operations and user authentication.
- Implemented JWT-based authentication and authorization to secure user access and sessions.
- Ensured seamless communication between frontend and backend using HTTPClient and JSON data formats.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3, SQL

Frameworks: Angular, Node.js, Express.js, RxJS, Chart.js, Leaflet.js, Bootstrap, Material-UI, Tailwind CSS

Developer Tools: Git, Azure DevOps, Visual Studio Code (Cursor), Postman, Jira

EDUCATION

Himalayan University
Bachelor of Computer Applications

Govt. Polytechnic Srinagar
Diploma In Computer Science

Uttarakhand
Aug. 2019 – May 2022

Uttarakhand
Aug. 2016 – May 2019
